

GUY ANGOTTI

A. My current Major is Finance and Economics. I'm not 100% sure what career i'm looking for specifically, but I know I don't want to go into banking. So far financial planning and wealth management sounds interesting to me.

B. I wouldn't say I have a huge technical background, but I've used computers my whole life. I would say I know my way around a computer, but not the technicalities. The software I do use are related to gaming as I have played games on computers for 8+ years. I use software such as steam and discord to play games and communicate with my friends.

C. I'm from Las Vegas, and I chose UNR because it was a place away from home, but not too far, and was more of a college experience. I'm apart of a social fraternity and currently the social and membership chair of Business Student Council on campus too. My favorite hobbies currently are weightlifting, hiking, thrifting, and reading. I love meeting new people and making new friends, and always excited to learn from others.
